

An Introduction to School Stream

Welcome to the Woodleigh School Community. We would like to introduce you to School Stream, a communication app designed specifically for schools.

This free app is available for both iOS and Android users. To get started, simply download the School Stream app on your device using the links below:

Once you've successfully downloaded School Stream, the next step is to set up your account. Your account approval process will be initiated once all relevant class, Homestead, and Teacher information has been finalised. In the event of any delays in account approval, rest assured that the necessary information is likely still being processed.

Upon account approval you will gain access to everyday news and reminders, upcoming events, weekly notices, calendars and more.

School Stream is an invaluable tool for staying connected with the Woodleigh community. If you have any questions or encounter any issues, please reach out for assistance by emailing news@woodleigh.vic.edu.au.

Welcome aboard.

WOODLEIGH SCHOOL

GETTING THE MOST OUT OF SCHOOL STREAM

Here are some tips to make things easier.

- **Enable Push Notifications:** School Stream utilises Push Notifications to keep you informed. When prompted, be sure to grant permission for push notifications so you can stay up to date.
- **Device Performance:** Smart devices, much like computers, can be affected by too many open apps. Ensure optimal performance by periodically force closing apps and performing occasional resets on your device.
- **Location Access:** School Stream requires location permissions to provide map functionality for events. Enable location access to ensure you have convenient access to map directions for various school activities.
